Satellite Signal

- Searching for satellites with no valid position.
- Got position, but very poor accuracy
- Position accuracy is getting better
- Good position accuracy
- The best position accuracy possible

Select the NEXT Cache

While on the CACHE NAVIGATION page, press the BIG button

1, 2, 3...

The CLOSENESS counter will show that you are going to the NEXT closest

View Cache ID

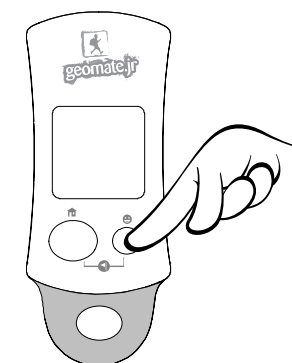

From the CACHE NAVIGATION page, press the SMALL button

You are now looking at the ID of the cache you are looking for!

NOTE: You know you are on the CACHE ID page when there is a small "GC" at the bottom of the screen.

Mark a Cache as FOUND

While on the CACHE NAVIGATION page, press and HOLD the SMALL button.

Store a HOME Location

Make sure you have satellites and a valid position

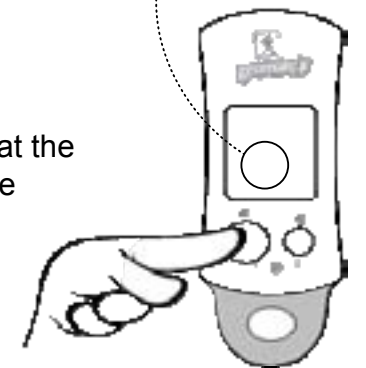

Now press and hold BOTH buttons for a few seconds

Navigate HOME

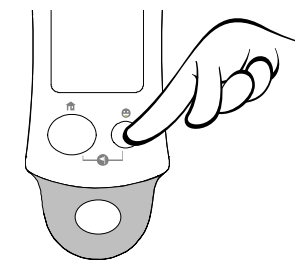

HO

Press and HOLD the BIG button.

'HO' will be displayed at the bottom to show you are navigating HOME

View Current Position

Press the SMALL button until you see the "N" icon in the bottom of the display

Now press the BIG button to view LATITUDE. Press it again to see LONGITUDE.

Loading Custom Waypoints into the Geomate.jr

Don't worry... loading your waypoints into the Geomate.jr couldn't be easier. Just follow the steps on this cheat sheet and you and your students will be up and running in no time!

You will need:

Your **WAYPOINTS** - find out how to locate them in the Geomate.jr User Guide (Pg.24) found in the appendix of the Educaching Teacher Manual. **A COMPUTER** with **INTERNET**, an **UPDATE KIT**, and your **GEOMATE.JR**.

Start Here!

1. Login at www.mygeomate.com
2. Go to **Geomate.jr Updates**
3. Click on **Custom Cache** tab
4. Click on **Create a New List**
5. **Name the list** A pop-up box appears. Note. the name can only be letters or numbers with no spaces.
6. **Adding Waypoints.** Now that you have named the List, it is time to add the waypoints! Click on the box **Add Geocache**.

7. Adding Waypoints Details. This is where you add in all the details of your waypoint.

- A. Cache ID. A unique identifier for each cache
- B. Latitude and Longitude
- C. Rate the size
- D. Rate the terrain
- E. Rate the difficulty to find
- F. Press **'Preview'** to check the location on the map

8. Click Add Geocache to List. To add additional waypoints repeat from step 6.

9. Connect your Update Kit to the computer and Geomate.jr. Switch on the Geomate.jr then press the **UPDATE** button!
